Projects

FULL-STACK SCHOOL APP: [GitHub Link](#)

- Full-Stack web application that provides a way for users to administer a school database containing information about courses.
- Students can retrieve, create, update and delete courses and it comes with User Authentication.
- Built with **React, Node.js, Express, SQL and Sequelize ORM** for data modelling, validation and persistence.

NOTE-TAKING MOBILE APP: [GitHub Link](#) [Live Demo](#) [APK](#)

- Note taking mobile app with a Bible Feature to view Bible Chapters and Verses.
- Built with **Flutter, SQFLITE** to store notes locally and utilization of a **BIBLE API**.
- Built for my personal use at church and works on both Android & iOS Devices.

See more of my work at my [Portfolio Website](#)
